

Company History

Advent Electric Incorporated has been serving East Tennessee and the surrounding areas for the past 30 years. We are capable of installing the electrical system in many construction types. They include industrial, commercial, healthcare, institutional, as well as residential. The next time you have an electrical project whether new, old, expansion, renovation, demolition, or construction give us a call. We are eager to contribute to the success of your lifestyle... No project to big or to small.

From your personal living space.

To a nearby convention.

Advent Electric Incorporated can take care of and responsibility for, your electrical network and its needs.

Positive Prevention

This breaker was removed from service when upon investigation abnormal readings were detected. The potential property damage and loss could have been catastrophic had it gone undetected!

% Of Leading Causes Of Residential Fires

According to the United States Fire Administration the number one leading cause of residential fires can be directly related to the properties electrical system. Household electrical panels for the most part never have the opportunity to receive any type of electrical maintenance. This alarming trend is leading the way in the loss of property due to fire!!!

- 19% Electrical
- 18% Arson
